Java, Kotlin, NodeJS, MongoDB, PostgreSQL, RabbitMQ, Redis, GraphQL, Docker, JUnit, Spock, Spring Framework, Spring Cloud Stream	Clean Architecture, Clean Code, Scrum, Agile, GTD

Relevant Experience

Mid-level Java Software Developer Jun 2021 – Present

Zup Innovation, São Paulo, Brazil

- Develop and implement features in microservices for a mobile store, including handling a large volume of client requests and data.
- Refactored a microservice that serves as the backend for the catalog, utilizing GraphQL, REST, RabbitMQ, and implementing clean architecture principles.
- Test, maintain, and recommend software improvements to ensure robust functionality and optimization.
- Collaborate with experienced team members to conduct root cause analysis of issues, review new and existing code, and/or perform unit testing.
- Write documentation.
- Create technical specifications and plans.
- Analyze user requirements and convert them into design documents.
- Resolve any potential bugs.
- Implemented Node.js job automations to streamline repetitive tasks.

Entry-level Java Software Developer Dec 2020 – Jun 2021

Zup Innovation, São Paulo, Brazil

- Collaborate on a critical service that enables users to upgrade their products after a specified period of time, utilizing Spring Boot, Java 11, Spring Cloud Stream, RabbitMQ, and MongoDB.
- Train new team members, teaching them the foundational code of the team.
- Develop and implement features according to specifications.
- Write tests and make improvements to the code.
- Resolve bugs.
